

SOLVENT SAVERTM RECYCLER

Solvent Recycler
HC (6 Gal) & SC (3 Gal)

*The
Professionals
Choice*

SOLVENT SAVERTM

Benefits

- Reduces your Solvent Purchases
- Reduces Your Hazardous Waste Generation
- Able to process Conventional, Alternative & Waterborne Solvents
- Listed Class I Division 1 Requirements
- CSA Listed to UL2208
- Fully Automated Cycle
- 2 Year Warranty—Longest in the Industry
- **BECCA CareTM** - Local sales, installation, training and service

CSA Listed per UL2208 Std for Solvent
Distillation Units &
for Class I Div 1 Requirements

"Innovation for Waste Minimization"

It's all about improving
your productivity, finishing
quality, & saving money.

In today's environment, operations know
the meaning of efficiency, reduced cycle
time and variable cost reduction.
BECCA continues to redefine what a
Solvent Recycler supplier should do for its
customers:

Help Customers Succeed

Deliver Quality Products

Bring the Latest in Technology

Provide the Best Service

**Caution! - Do not use with products
containing Nitrocellulose**

Product Specifications

Boiler Capacity: HC—6 Gal (27l) / SC-3 Gal (13 l)

Working Temp: 104—393°F (40—200°C)

Heating : Indirect - Thermic Oil

Cooling : Air—Fan

Recovery Rate: 95—100%

Electrical: 220 Volt 1 Phase

Amperage: HC—10 Amp / SC—5 Amp

Dimensions: 43"H x 33"W x 26" D

Construction: Class I Div 1 Explosion Proof,
Stainless Steel Tank & Lid, Ultra Powder
Coat Finish, One Touch Controls

Operating Time: 3-6 Hours

Weight: 260 lbs.

Shipping: Freight

**Generate substantial savings and less
waste hazardous to the environment!**

Savings generated from solvent recovery (95% rate)

Available Options

Recycler Bags – These bags are specially designed for performance. The Bag liner contains the left-behind residues, is easily and cleanly removed.

Protect™ Film – This is a maintenance film that makes clean-up simple and easy...just peel away the film and apply a new coating

Transfer Kit – Drum to Recycler – Pump Kit designed to allow transfer of solvent from a 55 Gallon Drum to the BECCA Solvent Saver Recycler. Includes St/St Braided lines with wand for long durable use

Accel-Cool™ System – This add on system uses compressed air through a Transvector to accelerate the cool down . This would mean less than 1-2 hour to the next process.

Vacuum Assist System— Lowers atmospheric pressure in the boiler for:

- Increase the differential between the Auto Ignition Temperature and the boiling point of a solvent., reducing the hazard.
- Increases the capability of the Recycler to handle solvents with high boiling points.
- Improves the speed of the Recycler from 10 – 30%.

Stainless Steel Condenser – This upgrades the condenser from Copper to Stainless Steel – necessary for some applications

"Anti-Foaming" Grill – This is perforated metal designed to break up bubble formation from certain waste solvent combinations

"Anti-Foaming" Additive - This additive will assist breaking up bubble formation from certain waste solvent combinations
